 A OneMonroe Company

Ford Atlantic

Strategic Global Sourcing for Procurement Professionals
Cost Control. Risk Reduction. Supply Chain Stability.
ISO 9001:2015 Certified

Built for Modern Procurement Teams

Procurement leaders today are measured on more than price. You are accountable for risk mitigation, supplier reliability, working capital efficiency, and long-term cost control.

 A One Monroe Company

866-202-6768 | www.fordatlantic.com

Ford Atlantic operates as a strategic sourcing partner to OEMs and industrial organizations seeking engineered components delivered through a controlled global supply model — with domestic accountability and structured quality oversight.

We help procurement teams reduce total landed cost while strengthening supplier stability and protecting operational continuity.

Why Procurement Professionals Partner with Ford Atlantic

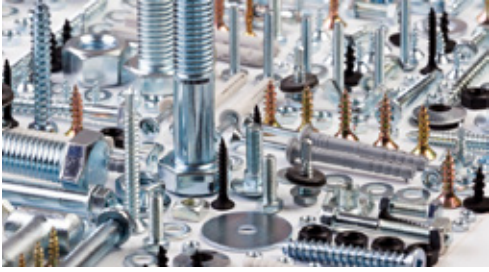

- Global manufacturing leverage with domestic billing and accountability
- Supplier consolidation across multiple manufacturing disciplines
- Engineering-backed sourcing and inspection oversight
- Volume purchasing strategies that reduce per-unit cost
- Inventory stocking programs that support working capital optimization
- ISO-certified quality management system

Procurement Outcomes We Deliver

- Reduced total landed cost
- Lower supplier risk exposure
- Improved lead-time reliability
- Simplified vendor management
- Predictable quality performance
- Controlled offshore sourcing with domestic accountability

Engineered Component Capabilities

Fasteners & Cold Headed Components

Custom and standard fasteners designed to meet structural requirements while driving measurable cost efficiencies. Ideal for high-volume OEM programs seeking supplier consolidation and controlled quality.

CAPABILITIES

Metal Stampings

Precision stampings produced using progressive and compound tooling. Optimized for cost-per-piece reduction and long-term program stability.

Castings (Investment, Die, Sand, Gravity)

Complete casting solutions including secondary machining and finishing. We integrate casting and machining under one sourcing strategy to reduce multi-vendor complexity and quality risk.

Precision Machined Components

Close-tolerance CNC and screw machine parts in a broad range of materials. Structured oversight ensures dimensional integrity and repeatability.

Plastic & Rubber Injection Molding

Full-service molding programs including tooling, production validation, and material optimization to reduce long-term program cost.

Extrusions

Custom aluminum and specialty extrusions engineered for design flexibility and scalable production efficiency.

Forging

Ford Atlantic delivers custom forging solutions for OEMs, contract manufacturers, and industrial buyers, supporting both prototype and production needs through a global network with expert tooling, materials, and quality oversight for reliable, cost-effective performance.

Assemblies & Sub-Assemblies

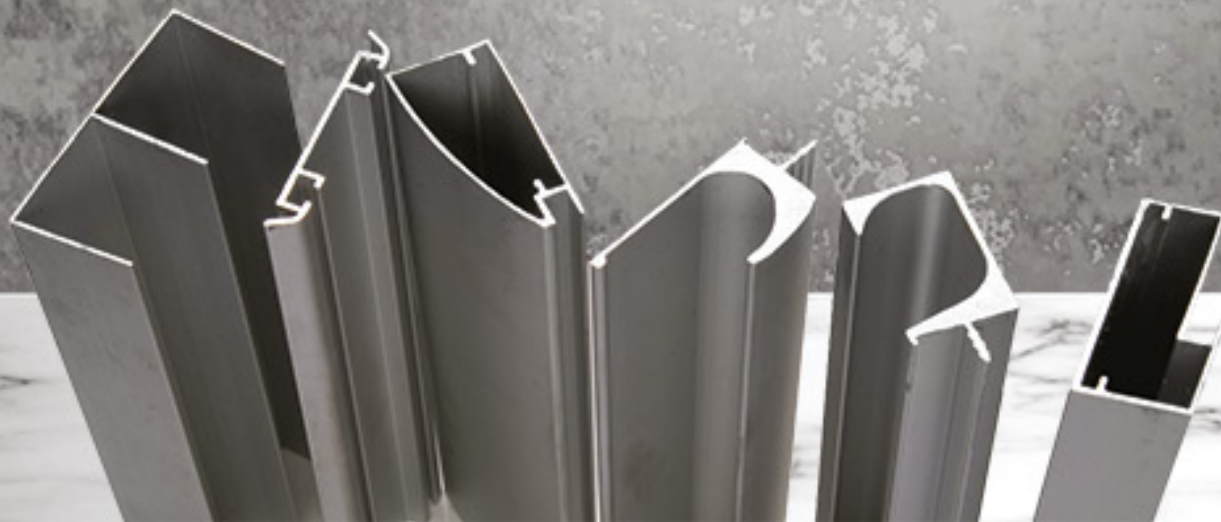

Integrated assembly solutions that reduce internal labor, streamline production, and simplify supply chain coordination.

THANK YOU

Strategic Cost Review Invitation

Our team will conduct a structured sourcing review to identify cost-saving opportunities, risk exposure points, and supplier consolidation advantages within your current supply chain.

Visit www.fordatlantic.com to begin your evaluation or connect directly with our sourcing team.
